

13 June 1980

MEMORANDUM FOR: Deputy Director of Security for  
Policy and Management

STATINTL FROM: [redacted]  
Deputy Director for Community Affairs

STATINTL SUBJECT: Changes to Directorate MBO Program

STATINTL REFERENCE: [redacted] Memo of 3 June 1980, Same Subject

- STATINTL
1. [redacted] memo on streamlining the MBO program lists for each DDA component items for documentation and others for discussion. D/Security asked for comments.
  2. I have no problems with the OS breakdown and think the objectives listed for discussion are appropriate.
  3. But I do think D/Security is shortchanging himself by ignoring the time and effort that is going into Community level activities, i.e., [redacted]  
[redacted] work with State on his No-Name Committee, Polygraph committee, and the whole array of SECOM plus Subcommittee actions which draw on OS and will do so increasingly as time goes on - every dimension of OS's effort is addressed in some degree in a Community context.
  4. You might want to follow Office of Data Processing's lead. They have for discussion something called "overview of Intelligence Community Support (resources, costs, trends)." Some ideas are attached if D/Security is interested.

STATINTL DD/CA/[redacted]:fh(13 June 80)

Office of Security  
Overview of Intelligence Community Support

1. OS provides services of common concern to the Intelligence Community that are increasingly using more OS resources and at greater costs.
2. The Community Security Group, (the SECOM staff) has taken 8 positions - two GS-15's are made available to the Community, and others are drawn from OS.
3. The Special Security Center does security surveys and briefings not only for CIA SCI areas but for all non-NFIB agencies. As these non-NFIB agencies are brought into the APEX program there will be an increased demand on this small element.
4. The CIB will require additional support for the transition to 4C.
5. There are aspects of the Investigations endeavor that require increased participation in the Community as (1) Congressional pressure for savings forces re-examination of what we can do to save investigative costs, (2) Litigation (i.e., *Jane Doe v. U.S. Civil Service Commission*) stimulates a need to commit resources to work out satisfactory new procedures on exchanging investigative results, (3) the Community moves in general to uniform investigative standard under various other pressures, not the least of which is the NSC Special Coordination Committee Counter-intelligence Working Group.
6. Physical Security concerns will require some commitment of additional resources at the Community level to work out uniform standards for, first, protecting APEX, and then working out procedures to protect collateral intelligence.
7. The Community's [redacted] training school at [redacted] It needs upgrading of its physical plant and considerable funds for new and modern equipment to teach countermeasures to new forms of technical attacks.

9. In connection with APEX, the Office of Security will in general be required to commit personnel and spend money during the implementation stages for briefings, travel and new forms and stamps for the Community.
